Create a Bucket in IBM Object Storage.

The screenshot shows the IBM Cloud Object Storage console. The left sidebar contains navigation links: IBM Cloud, Cloud Object Storage, Storage instances, Buckets, Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main content area shows the 'ilakkiya' bucket. Below the bucket name, there are tabs for 'Objects', 'Configuration', and 'Permissions'. The 'Objects' tab is active, displaying a table of objects. The table has columns for 'Object name', 'Archived', 'Size', and 'Last modified'. There are five objects listed, all with names starting with 'im_'. Below the table, there is a message: 'If you're seeing more usage than expected, versions count towards your usage or you may have incomplete uploads. Learn more'. At the bottom of the console, there is a 'Show all' button.

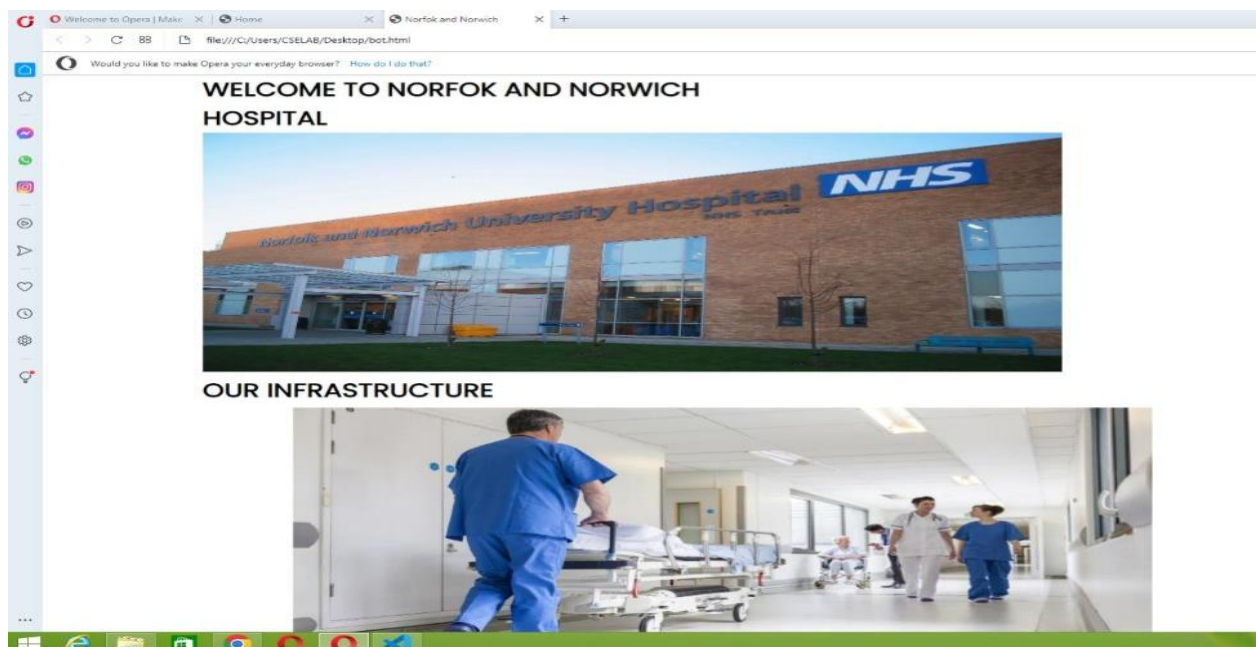

Object name	Archived	Size	Last modified
im_peg		61.8 KB	2022-11-02 10:08 AM
im_peg		80.3 KB	2022-11-02 10:09 AM
